Prefix BIOL  Course# 214  Title From Eggs to Organism  Units (3)
Description: How does a single cell give rise to a complex organism? How are
stem cells produced and what are possible uses of stem cell lines? How are
clones produced and what are the ethical considerations for cloning human
beings? How are test tube babies produced? This course will explore answers to
these questions by presenting an overview of developmental biology and then
focusing on the impact of biotechnology on humankind. No credit given
toward the major in biology.
