1. Catalog Description of the Course.

BIOL 215 ANIMAL DIVERSITY (4)
Three hours of lecture and three hours of laboratory per week
This course will survey the animal kingdom emphasizing the continuity of animal life from simple to more complex body forms and life histories. The diversity of animal life is projected on a framework of basic ecological and evolutionary concepts. Human interactions with animals are explored through management and conservation issues as well as historical examples from the sciences of zoology, classification and evolution. Field trips to selected sites will allow direct examination of local animal diversity. A lab fee is required.
GenEd: B2

3. Justification and Learning Objectives for the Course.

This is a general education course designed to meet the criteria for category B2-Life sciences. Students will be introduced to foundational biological concepts and processes (evolution and ecology). With this as a framework, the diversity of animals (fossil and modern) will be explored in a systematic (phylogenetic) fashion and in historical context (both biological history and scientific history), with reference to the biological (adapational/ecological) life of the groups examined. Human interactions with animal life will also be highlighted as appropriate, with conservation issues brought to the forefront whenever appropriate.

Students who successfully complete this course will be able to:
- explain and apply basic biological concepts
- describe the tenets of Zoological Classification
- identify characteristics of major animal groups
- diagram evolutionary history of major animal groups

4. Is this a General Education Course  YES

If Yes, indicate GE category:

5. **Course Content in Outline Form.**

1. Introduction to scientific method
2. Basic ecological principles
3. Basic evolutionary principles
5. Practical aspects of biodiversity (human interactions with animal diversity)

6. **References.**

7. **List Faculty Qualified to Teach This Course.**

   Biology faculty

8. **Frequency.**

   a. Projected semesters to be offered: Fall ____ Spring __X__ Summer _____

9. **New Resources Required.**

   a. Computer (data processing), audio visual, broadcasting needs, other equipment
   b. Library needs
   c. Facility/space needs
      Equipped Biology laboratory, collection of animal specimens

10. **Consultation.**

    Attach consultation sheet from all program areas, Library, and others (if necessary)

11. If this new course will alter any degree, credential, certificate, or minor in your program, attach a program modification.
