CALIFORNIA STATE UNIVERSITY CHANNEL ISLANDS
COURSE MODIFICATION PROPOSAL

 Courses must be submitted by November 2, 2009, to make the next catalog (2010--2011) production

DATE (CHANGE DATE EACH TIME REVISED): 10-18-09; REV 12.7.09
PROGRAM AREA(S): BIOLOGY

Directions: All of sections of this form must be completed for course modifications. All documents are stand alone sources of course information.

1. Course Information.
   [Follow accepted catalog format.] (Add additional prefixes if cross-listed)

Prerequisites: BIOL 100 or a college-level biology course strongly recommended
Consent of Instructor Required for Enrollment
Corequisites:

Catalog Description (Do not use any symbols): Study of disease-causing microorganisms such as bacteria, viruses, fungi, protozoa and parasites, emphasizing microbial structure, genetics, physiology and pathogenesis of microorganisms. Topics also include interaction between pathogens and their hosts, diagnosis, treatment, disease prevention as well as impact of infectious diseases on psychology, society, economy and global affairs. Microbial culturing, identification, differentiation and clinical diagnostic assays will be studied in the laboratory. No credit given toward the biology major.

General Education: B2

3. Course Attributes:

General Education Categories: All courses with GE category notations (including deletions) must be submitted to the GE website: http://summit.csuci.edu/geapproval. Upon completion, the GE Committee will forward your documents to the Curriculum Committee for further processing.

A (English Language, Communication, Critical Thinking)
- A-1 Oral Communication
- A-2 English Writing
- A-3 Critical Thinking

B (Mathematics, Sciences & Technology)
- B-1 Physical Sciences
- B-2 Life Sciences – Biology
- B-3 Mathematics – Mathematics and Applications
- B-4 Computers and Information Technology

C (Fine Arts, Literature, Languages & Cultures)
- C-1 Art
- C-2 Literature Courses
- C-3a Language
- C-3b Multicultural

D (Social Perspectives)

E (Human Psychological and Physiological Perspectives)

UDIGE/INTD Interdisciplinary

Meets University Writing Requirement

Meets University Language Requirement

American Institutions, Title V Section 40404: Government US Constitution US History

Refer to website, Exec Order 405, for more information: http://senate.csuci.edu/comm/curriculum/resources.htm

Service Learning Course (Approval from the Center for Community Engagement must be received before you can request this course attribute).

4. Justification and Requirements for the Course. [Make a brief statement to justify the need for the course]

OLD
Medical Microbiology is a required course for pre-nursing and allied health students to be served by the Biology program. It is a study of disease-causing microorganisms, including their structures and functions and their interactions to their host animals and the environment. It provides valuable knowledge and skills to pre-nursing and allied health students in dealing with disease-causing microbes such as bacteria, viruses, fungi and protozoa in the hospital or clinical settings. It is a highly relevant course particularly in this era of global epidemics of numerous infectious diseases and potential biological warfare.

NEW
Medical Microbiology is a required course for pre-nursing and allied health students to be served by the Biology program. It is a study of disease-causing microorganisms, including their structures and functions and their interactions to their host animals and the environment. It provides valuable knowledge and skills to pre-nursing and allied health students in dealing with disease-causing microbes such as bacteria, viruses, fungi and protozoa in the hospital or clinical settings. It is a highly relevant course particularly in this era of global epidemics of numerous infectious diseases and potential biological warfare.

5. Learning Objectives. (List in numerical order. You may wish to visit resource information at the following website: http://senate.csuci.edu/comm/curriculum/resources.htm)
Upon completion of the course, the student will be able to:

OLD
1. Describe disease-causing microorganisms and microbial agents at organismal, cellular and/or molecular levels.
2. Relate normal cellular and molecular structures to their functions.
3. Explain cellular processes and mechanisms that lead to physiological functions and pathological state.
4. Handle situations and incidents at medical settings involving potential pathogens.
5. Apply modern biological techniques to identify potential pathogens and solve aspects of scientific problems.

NEW
1. Describe disease-causing microorganisms and microbial agents at organismal, cellular and/or molecular levels.
2. Relate normal cellular and molecular structures to their functions.
3. Explain cellular processes and mechanisms that lead to physiological functions and pathological state.
4. Demonstrate the ability to handle situations and incidents at medical settings involving potential pathogens.
5. Apply modern biological techniques to identify potential pathogens and solve aspects of scientific problems.

6. Course Content in Outline Form. (Be as brief as possible, but use as much space as necessary)

OLD
Introduction to medical microbiology
Basic principles of medical microbiology
Basic concepts in immune response
General principles of laboratory diagnosis
Medical bacteriology
Medical virology
Medical mycology
Medical parasitology
Impact of infectious diseases

NEW
Introduction to medical microbiology
Basic principles of medical microbiology
Basic concepts in immune response
General principles of laboratory diagnosis
Medical bacteriology
Medical virology
Medical mycology
Medical parasitology
Impact of infectious diseases

Does this course content overlap with a course offered in your academic program? Yes ☐ No ☒
If YES, what course(s) and provide a justification of the overlap. ______________________________

Does this course content overlap a course offered in another academic area? Yes ☐ No ☒
If YES, what course(s) and provide a justification of the overlap. ______________________________

Overlapping courses require Chairs' signatures.

7. Cross-listed Courses (Please note each prefix in item No. 1)
   A. List cross-listed courses (Signature of Academic Chair(s) of the other academic area(s) is required).
   B. List each cross-listed prefix for the course: ______________________________
   C. Program responsible for staffing: ______________________________

8. References. [Provide 3-5 references]

9. Tenure Track Faculty qualified to teach this course.

Biology faculty

10. Requested Effective Date or First Semester offered: F2010

11. New Resource Requested:  Yes  No  x
If YES, list the resources needed.

A. Computer Needs (data processing, audio visual, broadcasting, other equipment, etc.)

B. Library Needs (streaming media, video hosting, databases, exhibit space, etc.)

C. Facility/Space/Transportation Needs:

D. Lab Fee Requested:  Yes  No  (Refer to the Dean's Office for additional processing)

E. Other:  

12. Indicate Changes and Justification for Each.  [Check all that apply and follow with justification. Be as brief as possible but, use as much space as necessary.]

Justification:  This course is a required course for students enrolled in the Clinical Laboratory Science (CLS) Emphasis of the BS in Biology program. Hence, we need to modify the last sentence of the catalog description for the course to allow students in the CLS program to obtain credit toward their major after completion of the course. The reason that students enrolled in other emphases of the biology program are not given credit toward their major after taking BIOL 217 is that they are required to take an upper-division microbiology course, BIOL 301, which is a general microbiology course, not one like BIOL 217 which is focused on medically-related microorganisms.

13. Will this course modification alter any degree, credential, certificate, or minor in your program?  Yes  No  x
If, YES attach a program update or program modification form for all programs affected.
Priority deadline for New Minors and Programs: October 5, 2009 of preceding year.
Priority deadline for Course Proposals and Modifications: November 2, 2009.
Last day to submit forms to be considered during the current academic year: April 15th.

Ching-Hua Wang  10-18-09
Proposer(s) of Course Modification          Date

Type in name. Signatures will be collected after Curriculum approval.

Deleted: This course is a required course for students enrolled in the Clinical Laboratory Science (CLS) Emphasis of the BS in Biology program. Hence, we need to modify the last sentence of the catalog description for the course to allow students in the CLS program to obtain credit toward their major after completion of the course. The reason that students enrolled in other emphases of the biology program are not given credit toward their major after taking BIOL 217 is that they are required to take an upper-division microbiology course, BIOL 301, which is a general microbiology course, not one like BIOL 217 which is focused on medically-related microorganisms.
GE CRITERIA APPROVAL FORM

Course Number and Title: BIOL 217 Medical Microbiology

Faculty member(s) proposing Course: Ching-Hua Wang

Indicate which of the following GE would be satisfied by this course by marking an “X” on the appropriate lines. Courses may be placed in up to two GE categories as appropriate. Upper Division Interdisciplinary GE courses (UDIGE) may be placed in two GE categories in addition to the UDIGE category.

</table>

Please provide a brief explanation of how the proposed course meets each of the criteria for the selected GE categories.

BIOL. 217 Medical Microbiology is a study of disease-causing microorganisms such as bacteria, viruses, fungi, protozoa and parasites. The course covers extensively the relationship between these pathogenic organisms and their hosts and their environment. The principles and concepts that form the foundation of living systems will be discussed throughout this course. The impact of infectious diseases on psychology, society, economy and global affairs will be emphasized as well. It will present scientific knowledge in a historical perspective and demonstrate the importance of science to the development of civilizations. The course uses the scientific method to study the various microbial forms, and builds skills in scientific reasoning and critical thinking.

Students who successfully complete this course will be able to:
1. Describe disease-causing microorganisms and microbial agents at organismal, cellular and/or molecular levels.
2. Relate normal cellular and molecular structures to their functions.
3. Explain cellular processes and mechanisms that lead to physiological functions and pathological state.
4. Handle situations and incidents at medical settings involving potential pathogens.
5. Apply modern biological techniques to identify potential pathogens and solve aspects of scientific problems.
Hence we believe that this course meets each of the criteria in GE category B.
**Approval Sheet**

**Course:**

If your course has a General Education Component or involves Center affiliation, the Center will also sign off during the approval process.

Multiple Chair fields are available for cross-listed courses.
