1. Catalog Description of the Course. [Follow accepted catalog format.]

Prefix BIOL  Course# 510  Title :  TISSUE CULTURE TECHNIQUES AND STEM CELL TECHNOLOGY
Units (3)
1  hours  lecture per week
6 hours  laboratory per week
Prerequisites BIOL 300
Corequisites

Description Examines theory and concepts of animal and plant cell and tissue culturing. Focuses on stem cell technology including types of stem cells, ethics of stem cells, pluripotency, culture methods, characterization, monitoring tools such as imaging and differentiation strategies.

Graded
Gen Ed
CR/NC
Repeatable for up to units
Categories
Lab Fee Required
A - F
Total Completions Allowed
Optional (Student’s choice)
Multiple Enrollment in same semester

3. Justification and Learning Objectives for the Course. (Indicate whether required or elective, and whether it meets University Writing, and/or Language requirements) [Use as much space as necessary]

Tissue Culture Techniques and Stem Cell Technology is a required course for the MS/MBA dual degree program. This course will provide students with a solid foundation in the theory and techniques of animal and plant tissue culture and an in-depth view of the current state of the science of human embryonic stem cells and their potential applications in regenerative medicine.

Learning Outcomes: Upon completion of the course, students will be able to:
1. Grow, maintain, and propagate specific animal and plant cell types in a sterile environment.
2. Identify the problems associated with growing, storing and identifying a wide range of different cell types and plant tissues.
3. Describe how cell culture can be used for in vitro studies and commercial applications.
4. Articulate the conceptual basis and ethical issues surrounding stem cell research.
5. Demonstrate embryonic stem cell propagation methods.

4. Is this a General Education Course  YES ☐  NO ☒

If Yes, indicate GE category and attach GE Criteria Form:

A (English Language, Communication, Critical Thinking)
A-1 Oral Communication
A-2 English Writing
A-3 Critical Thinking

B (Mathematics, Sciences & Technology)
B-1 Physical Sciences
B-2 Life Sciences – Biology
B-3 Mathematics – Mathematics and Applications
B-4 Computers and Information Technology

C (Fine Arts, Literature, Languages & Cultures)
5. Course Content in Outline Form.  [Be as brief as possible, but use as much space as necessary]

Animal and Plant tissue culture
1. Various systems of tissue culture - their distinguishing features, advantages and limitations; types of media; types of cell lines and their maintenance; transfection strategies
2. Methodology: Primary culture; adherent and suspension cultures; maintenance of sterility and use of antibiotics; mycoplasma and contaminant detection; plant culture techniques such as micropropagation and callus cultures.
3. Characteristics of cells in culture and growth studies (Cell proliferation, cell cycle, mitosis).

Stem Cell Technology
1. Ethics - What are the pros and cons of using human embryonic stem cells vs. adult stem cells?
2. Culture methods - Description of the different culture methods.
3. Characterization and Differentiation - Includes the use of flow cytometry and immunocytochemistry and identification of differentiated tissues; strategies for differentiation; concept of pluripotency
4. New monitoring tools - Imaging and identifying stem cell morphology and cell numbers

Does this course overlap a course offered in your academic program? YES ☒ NO ☐
If YES, what course(s) and provide a justification of the overlap? There is some overlap between this course and BIOL 404. The differences are:
1. BIOL 404 is serving the undergraduate program and this one is serving the dual MS Biotechnology and MBA program;
2. BIOL 404 covers the basics of tissue culture. Stem cell technology is covered only slightly whereas BIOL 510's main emphasis will be on stem cell technology;
3. BIOL 404 requests a lab fee whereas BIOL 510 does not due to a different fee structure within Extended Education programs.

Does this course overlap a course offered in another academic area? YES ☐ NO ☒
If YES, what course(s) and provide a justification of the overlap?
Signature of Academic Chair(s) of the other academic area(s) is required on the signature sheet below.

6. Cross-listed Courses (Please fill out separate form for each PREFIX)
List Cross-listed Courses

Signature of Academic Chair(s) of the other academic area(s) is required on the signature sheet below.

Department responsible for staffing:

7. References.  [Provide 3 - 5 references on which this course is based and/or support it.]

5. Embryonic Stem Cells, Methods and Protocols, by Kursad Turksen (Ottawa Health Research Institute, Ottawa, Ontario, Canada), Humana Press.
8. **List Faculty Qualified to Teach This Course.**

Nitika Parmar and other Biology faculty members

9. **Effective Date and Frequency.**
   a. Projected semesters to be offered:  Fall ☐  Spring ☒  Summer ☐
   b. First semester offered: Spring

10. **New Resources Required.**  YES ☒  NO ☐
    If YES, list the resources needed and obtain signatures from the appropriate programs/units on the sheet below.
    a. Computer (data processing), audio visual, broadcasting needs, other equipment
    b. Library needs
    c. Facility/space needs

11. **Will this new course alter any degree, credential, certificate, or minor in your program?**  YES ☒  NO ☐
    If, YES attach a program modification form for all programs affected.

Nitika Parmar  11/16/2006
