3. Justification and Learning Objectives for the Course. (Indicate whether required or elective, and whether it meets University
Writing, and/or Language requirements) [Use as much space as necessary]

Libraries are widespread and highly familiar institutions. This course will introduce students to issues facing libraries from many
different perspectives including business, economics, library science, and education. Field trips to local libraries, lectures,
discussions, and guest speakers will enable students to: (a) examine the complex interdisciplinary issues facing modern libraries;
(b) examine the roles and contributions of libraries to the local and global community; and (c) examine the changing public
perception of libraries in contemporary society.

Upon completion of this course, students will be able to:

• Reflect in written and oral forms on the history, mission, and roles of libraries.
• Describe the roles of business, economics and education within libraries.
• Analyze the interactions of business, economics and education in libraries. This analysis will include the ways that these
disciplines complement and conflict with one another.
• Describe the functions and basic organizational structures of libraries.
• Evaluate critically library collections and services.
• Compare and contrast the roles of public, school, academic, and special libraries.
• Analyze ethical issues in managing libraries.
• Synthesize knowledge and information by developing and presenting a proposal for a new library program, service, or collection.

Please provide a brief explanation of how the proposed course meets each of the criteria for the selected GE categories.

Category D:

**Promote understanding of how the issues relevant to social, political, contemporary/historical, economic, educational or psychological realities interact with each other within the realm of human experience**

Libraries are a very real part of the human experience. Most people have used a library, but not necessarily in the ways one might think, in-person and to read a book. The course will look at the historical, social, economic, educational impacts of this institution.

**Focus on how a social science discipline conceives and studies human existence**

The library will be examined from a variety of social science disciplines.

**Address issues using the methods commonly employed by a social science discipline.**

The library will be examined using methods from several social science disciplines. One example is that students will be asked to describe micro and macroeconomic issues facing libraries.
Emphasize interdisciplinarity by integrating content, ideas, and approaches from two or more disciplines

This course was developed by faculty in four different program areas. Using the issues surrounding library collections, services, and instruction as a framework the course is able to fully integrate content, ideas, and approaches from all four disciplines and beyond.

Include substantive written work.

Students reflect in written and oral forms on the history, mission, and roles of libraries. Students will be asked to keep a written journal.

Students will synthesize knowledge and information by developing a written proposal for a new library program, service, or collection.
