marketing as applied in a variety of organizational settings. A distinguishing aspect of the Business and Economics Program is the requirement to take courses developed in conjunction with disciplines outside the traditional business curriculum. Examples include courses with Biology, Chemistry, Education, English, Fine Arts, and History.

In addition, a Capstone Course provides students with the opportunity to integrate their knowledge through a Global Strategy Simulation exercise. To foster an integrative and cross disciplinary experience in a relevant business area, students are required to select one of five emphases: Entrepreneurship, Finance, Global Business, Management, and Marketing. All emphases draw on upper-division courses from accounting, economics, management and marketing to offer an in-depth perspective into five critical areas of business. We anticipate enhancing the curriculum with additional emphasis choices as the program grows.

The Bachelor of Arts in Economics focuses on the integration of core economic analysis with relevant interdisciplinary applications. The degree develops analytical tools and communication skills in the context of economic theory and its linkages to a broad array of human decisions. Economics, as a social science, seeks to explain and predict the behavior of consumers, producers, managers, government officials and citizens by examining the interactions of incentives and constraints in an environment of ever-present scarcity of time, skills and resources. Microeconomics focuses on the choices of individuals and firms, as well as their role in the marketplace, while macroeconomics aggregates economic activity to the national level to analyze trends and fluctuations in overall economic activity. The Bachelor of Arts in Economics program offers flexibility and opportunity through its emphases: general, environmental resource, international, managerial or quantitative economics. These emphases allow students to pursue specific interests and maximize connections to disciplines related to economics.

SUMMARY OF CHANGES

- Changed title for Rivera from Assistant to Associate
- Added J. Smith to faculty listing
- Added Bus 335 and Bus 344 as UDIGE courses offered by Business
- Modified Entrepreneurship emphasis to have core and optional courses
- Added Mgt 424 as an option in the Entrepreneurship emphasis
- Modified Global Business emphasis by moving Acct 410 from core to optional
- Added Fin 412 and Mgt 471 as options in the Global Business emphasis

JUSTIFICATION

The changes of substance to the BS in Business serve to clarify the course options available to students and, in the case of the changes to the emphases, add flexibility to the program.
