3. **Justification and Learning Objectives for the Course.** (Indicate whether required or elective, and whether it meets University Writing, and/or Language requirements) [Use as much space as necessary]

This is an elective course for the Bachelor of Science program in Business and for the minor in Economics. An understanding of the international macroeconomy is essential for students of business and economics. This course will provide business and economics students with the knowledge, skills, and abilities to understand alternative exchange rate systems, factors that cause exchange-rate fluctuations, and the determinants of a country's balance of trade. The course will examine the consequences of balance of payments disequilibrium for national income and prices, as well as the international transmission of inflation and unemployment. The course will also address the macroeconomic implications of international financial markets, and international economic policy coordination.

Learning Objectives:
Students who successfully complete this course will be able to:
- describe various exchange rate theories and forecast foreign exchange rates
- predict the consequences of balance of payments disequilibrium on the national economy
- describe the emergence of international financial and currency crises
- evaluate the costs and benefits of alternative exchange rate policies
- evaluate the costs and benefits of international economic policy coordination

4. **Is this a General Education Course** YES

If Yes, indicate GE category:
