3. Justification and Learning Objectives for the Course. (Indicate whether required or elective, and whether it meets University Writing, and/or Language requirements) [Use as much space as necessary]

This course is an elective for Masters of Arts in Education students. It will also provide students with a way to satisfy CCTC requirement for advanced preparation in the use of computers and technology for teaching (specifically for the Special Education Level II program).

As a result of completing this course students will be able to:

1. Recognize the ways in which they learn best and how this influences their teaching, especially with regard to teaching with technology
2. Teach others how to use computers and different computer applications
3. Analyze use of and identify appropriate uses of technology as a tool to achieve desired teaching and learning goals (“technology” meaning various types of computers, peripherals, technology using the Internet, computer applications, and assistive technology devices).
4. Evaluate and model appropriate use of copyright, fair use standards, and principles of universal design
5. Use and be able to teach students how to use the Internet as an effective research tool
6. Create and use multimedia documents to support teaching and learning using a variety of technologies
7. Analyze different approaches to teaching using online and other distributed (also known as distance) forms of education (such as ITV, Internet video conferencing, synchronous & asynchronous discussions, course management systems).
8. Develop and maintain a basic professional portfolio web site
9. Critique the effectiveness of how they and others use technology as a teaching tool
