Elective for the Psychology major
For thousands of years philosophers have struggled with questions surrounding the issue of morality. Over the past hundred years psychologists have joined the fray. This course will challenge students to develop their own capacities to analyze, criticize, evaluate, and construct policy-oriented arguments. Through this course, students will:

1. Describe and explain philosophical systems of ethical thought and moral action (e.g., utilitarianism, philosophical egoism, deontological systems, absolutist systems, ethics of care systems)
2. Pose and “solve” moral dilemmas according to the philosophical systems studied
3. Develop conceptual tools and argumentative strategies to determine and evaluate assumptions, values, and information that underlie different positions on controversial ethical issues
4. Describe the relevant psychological theories associated ethics and ethical behavior
5. Integrate classical philosophical and newer psychological systems of ethics
6. Refine oral, written, and critical thinking skills by class presentations, group work, and a literature review
