<div style="display: flex; justify-content: space-between;"> Lab Included? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> </div>	

Please provide a brief explanation of how the proposed course meets *each* of the criteria for the selected GE categories.

Psy 346 provides an in-depth survey of psychological and biological theories of motivation. This course teaches students to read and use research findings in order to find solutions for social, biological and psychological issues and challenges.

Students who successfully complete this course will be able to:

- ☐ explain the role of different motivational factors in the development of several social, biological and psychological problems and challenges.
- ☐ be able to find ways to improve upon human relationships, treatment for addictions, basic motivations like sleep and hunger, human sexuality, adolescent development, manager-employee interactions and current social problems
- ☐ research a topic and create their own synthesis of the solutions to a problem out of the research findings found.
- ☐ apply the biological and psychological theories of motivation to numerous settings.
- ☐ develop a comprehensive leadership plan for a particular setting
