

Proposed Name of Degree:	Bachelors Degree in Performing Arts
Faculty Proposing New Program:	Jacquelyn Kilpatrick, Ph.D. Theodore Lucas, Ph.D. Bob Mayberry, Ph.D., M.F.A.

Date of Proposal: February 28, 2005

Date of Faculty Meeting: Academic Master Plan Task Force Meetings 2003-04

Date of Consultation with Academic Affairs: August, 2004

Curriculum Chair: _____ Date: _____

Chair, Academic Senate: _____ Date: _____

President (or designee): _____ Date: _____

1. Definition of the Proposed Degree Major Program

The proposed bachelor's degree in Performing Arts Program at California State University Channel Islands will offer a broadly integrated undergraduate experience in music, drama, and dance, with attention to the relatively new field of audience studies. The core courses provide the base necessary for building an educational and professional career in the Performing Arts, and emphasis courses provide focused experience in a specific field within the performing arts.

a. Name of the proposed degree major program, and academic year of intended implementation.

Bachelors Degree in Performing Arts

b. Name of the department, departments, division or other unit of the campus that would offer the proposed degree major program. Identify the unit that will have primary responsibility.

Performing Arts Program
Division of Academic Affairs

c. Name, title, and rank of the individual(s) primarily responsible for drafting the proposed degree major program.

Theodore Lucas, Ph.D.
Vice President Academic Affairs, Provost

N. Jacquelyn Kilpatrick, Ph.D.
Professor and Chair of English

Bob Mayberry, Ph.D., M.F.A.
Associate Professor of English

Ralph A. Cohen, Ph.D.
Executive Director, American Shakespeare Center
Professor of Shakespeare and Renaissance Drama in Performance
Mary Baldwin College
Staunton, Virginia

d. Objectives of the proposed degree major program.

The proposed Performing Arts Program at California State University Channel Islands offers a broad, integrated undergraduate experience in music, drama, and dance, with attention to the relatively new field of audience studies. The core courses provide the base necessary for building an educational and professional career in the Performing Arts.

Students take basic core courses in each of the three major areas of the performing arts—Dance, Music and Theatre—and choose an emphasis to follow through one of these areas.

- The CSUCI music emphasis (PAMU) provides a music curriculum of musicology (history and literature), music theory and composition, applied music instruction in voice and instrumental areas, and performing ensembles.
- The Dance emphasis (PADA) provides opportunities for study in ballet, modern dance, jazz and choreography, as well as performance opportunities.

- The Theatre emphasis (PATH) offers courses in acting, makeup, costuming, directing and technical theatre as well as performance opportunities.

The Performing Arts undergraduate degree program at CSUCI has several goals, the primary of which is meeting the philosophical, educational and cultural objectives of the university mission statement. Within this overarching goal, the program will stress interdisciplinarity and the multicultural, global perspective that is the hallmark of Channel Islands programs. In addition to gaining expertise and experience in their chosen field of theatre, dance or music, students will gain interdisciplinary experience in the performing arts, with education and experience in the intersections between the fields. They will also develop their abilities to think critically, analyze written and visual texts, express themselves effectively in written and spoken form, and to apply multiple theoretical perspectives. The Performing Arts major will prepare students for further study and for entry into the performing arts professions.

2. Justification for the Proposed Degree Major Program

Ventura County is geographically well situated for performing arts. Los Angeles is, of course, a rich source, but Ventura County also has many performing arts venues. Music, Dance and Theatre companies abound in the area and range from amateur groups to Equity companies. Interest in the performing arts is high in the area, and artists wishing to extend their knowledge and education in the field are numerous. Students who would like to be involved in the performing arts currently must travel to the Los Angeles area or to Santa Barbara, something not all students are able to do. CSUCI would provide the education and experience these students require.

a. List of other California State University campuses currently offering or projecting the proposed degree major program; list of neighboring institutions, public and private, currently offering the proposed degree major program.

Because the proposed Performing Arts degree program at CSUCI crosses the disciplines of dance, music and theatre, it is intrinsically different than the programs at other CSUs. Those that offer two or more of performing arts do so as separate entities.

CSUs offering Dance, Music and Theatre include:

CSU East Bay
CSU Fresno
CSU Fullerton
CSU Long Beach
CSU Northridge
CSU Sacramento
San Diego State
San Francisco State

CSUs offering Music and Theatre include:

CSU Bakersfield
Cal Poly Pomona
Cal Poly San Luis Obispo

CSU Chico
CSU Dominguez Hills
CSU Humboldt
CSU Sonoma

CSU offering Theatre:
CSU Monterey Bay

UC Santa Barbara, Westmont College, California Lutheran and Pepperdine are the nearest non-CSU universities offering degrees in the Performing Arts.

b. Differences between the proposed program and programs listed in Section 2a above.

The primary difference in the proposed CSUCI program is its interdisciplinary aspect. Students in each emphasis will also receive a good, working background in the other two emphases but will focus on their chosen discipline. In addition, all Performing Arts majors will take courses that pertain to their field of study but span disciplines within and outside the Performing Arts.

As examples, PA 335/BUS 335: Business and the Performing Arts will give students an understanding of the special management, accounting and other business-related needs of performing arts organizations. PA 350: Audience Studies is an interdisciplinary course that will draw upon the disciplines of psychology, sociology and performance studies to give our students a firm understanding of the affects and effects of performance and audience response. PA 406/PHYS 406: Physics of Performing Arts will give student performers an understanding of body movement akin to that given to athletes.

c. Professional uses of the proposed degree major program.

The bachelors degree in performing arts from CSUCI will prepare students for further graduate study. It will also prepare students to perform as dancers, musicians, actors, directors, or play writers. It will also be of use to current performing artists who wish to develop their knowledge and experience bases.

d. Community/Regional/Statewide need for the proposed program.

e. The expected number of majors in the year of initiation and three years and five years thereafter. The expected number of graduates in the year of initiation and three years and five years thereafter.

In addition to the 23 high schools in the CSUCI service area, there are 8 community colleges. Three of those community colleges lie within the Ventura County Community College District.

The estimates below are based on consultations with representatives on the community college campuses and information gathered by CSUCI personnel.

	<u>Number of Majors*</u>	<u>Number of Graduates*</u>
Initiation Year	55	0
Third Year	100	30
Fifth Year	200	75

3. Resources Needs for the Proposed Degree Major Program (faculty, instructional, library, other)

a. Existing.

CSUCI does not have a performing arts venue at present, but we envision building one in the relatively near future. In the meantime, our conference halls and other special use classrooms are sufficient to begin the major. Performing arts courses have priority usage for all three conference halls on campus. CSUCI is presently converting space in the existing buildings on campus, and some of those will be designed for additional performance classes. In addition, CSUCI has developed good working relationships with the performance companies in the surrounding area, and they have suggested that their venues may be available to us.

b. Future.

In the future, CSUCI will need to build a performing arts venue for classes, performances and community activities.

At least one new full time, tenure track faculty member will be required during the first year of implementation; most of the courses can be taught by temporary faculty or tenure track faculty currently on campus. In subsequent years, as the budget allows, more tenure track faculty members specifically in the performing arts will be hired.

We will need to purchase a relatively small number of resources for the library. Most of these, however, will be in electronic format. Given that our enrollment is still fairly small, the cost of those resources should be reasonable.

To implement the program, we will require lighting equipment, sound boards and other acoustical equipment, and a dance floor. Those, in addition to classroom space currently being configured, will be sufficient to run the program for the first two years.
