Prefix SOC/PSY/POLS Course\# 303 Title Statistical Applications in the Social Sciences Units (3)
2 hours lecture per week
2 hours activity per week
Prerequisites: MATH 105 or equivalent
$\square$ Corequisites:
Description (Do not use any symbols): This course introduces students to quantitative methods as used in social science research and prepares them for statistical literacy. Students will learn to use descriptive and inferential statistics to test hypotheses. Basic topics covered in the class include graphical representations, central tendency and variability, chi-squared and other nonparametric techniques, correlation and regression, and mean difference tests as applied to research methods and data commonly used in the social sciences. Measurement and psychometric issues unique to social science data will be covered. Students will use SPSS to analyze data. Same is PSY 303, POLS 303.

Justification: As originally proposed (2 hour lecture/2 hour activity) the course meets for four contact hours per week. The students need this contact to master statistical techniques and analysis, but in fact, the two hours of activity is best described currently as lecture with active learning teachniques. Strict laboratory sessions (or activity sessions) will not be the mode of delivery for this course. The amount and difficulty of the material for students necessitates four units of course lecture time. The amount and difficulty of the material for students necessitates four units of course time. The delivery and not the content of the course will change.
7. $\square$ General Education Categories: All courses with GE categories notations (including deletions) must be processed at the GE website: http://summit.csuci.edu/geapproval. Upon completion, the GE Committee will forward your documents to the Curriculum Committee for further processing.
